EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. This communication is an Examiner's reasons for allowance in response to application filed on August 29, 2001, assigned serial 09/943,126 and titled "INFORMATION PROCESSING APPARATUS, INFORMATION PROCESSING METHOD AND PROGRAM STORAGE MEDIUM".

2. The following is the Examiner's statement of reasons for the indication of allowable subject matter:

3. After carefully reviewing the application in light of the prior art of record and the search of all the possible areas relevant to the present application, a set of related prior art references has been found, but those prior art references are not deemed strong to make the application unpatentable. Thus, it is found that the application is now in condition for allowance.

4. Although the prior art disclose several claimed limitations, none of the references teaches an information processing apparatus, method and program storage medium which includes a creating means for creating file names which represent a map each and which are constituted each by an identification code for identifying a map structure of a given area, by a level code for denoting a scale level of the map, and by unit codes for indicating which part of the area is covered by the map, reading means for reading map data managed in term of the file names created by the creating means, and display controlling means for controlling display of maps based on the map data read out by the reading means (claims 1, 8, 9, 10, 17, and 18). Also, neither references teaches an information processing apparatus, method and program storage medium which includes a creating means for creating file names which represent a floor map each and which

are constituted each by an identification code for identifying a building, by a floor code for identifying a floor inside the building, by a level code for denoting a scale level of the floor map depicting the floor, and by unit codes for indicating which part of the floor is covered by the floor map, reading means for reading map data managed in term of the file names created by the creating means, and display controlling means for controlling display of floor maps based on the floor map data read out by the reading means (claims 19, 24, 25, 26, 31 and 32).

5. Claims 1-32 are allowable over the prior art of record.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Tan Q. Nguyen, whose telephone number is (703) 305-9755. The examiner can normally be reached on Monday-Thursday from 5:30 AM-4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black, can be reached on (703) 305-8233.

Any response to this action should be mailed to:
